HELEN project report

During the time I stayed at CERN, I have reviewed the status of the analysis of the decay channel $B \rightarrow DK^*$, which is part of my PhD student's thesis. This student is presently at CERN and will discuss his progress with the rest of the collaboration in the coming months.

Apart from that I continued to work on the muon identification code, which had to be adapted to the LHCb software upgrade that took place some months ago.

I have also discussed the possibility of having a federated tier 2 in Brazil running both LCG and OSG middleware with the ATLAS and LHCb spokes persons and the LCG responsables.
